Baker, Kirby A.: Strong shift equivalence and shear adjacency of nonnegative square integer matrices, 131

Bapat, R. B. and Kwong, Man Kam: A generalization of $A \circ A^{-1} \geqslant I$, 107

Byers, W.: Matrices induced by endomorphisms of finite sets, 81

Cao, Zhi-hao: Residual error bounds of generalized eigenvalue systems, 113

Chan, Gin-Hor, Lim, Ming-Huat, and Tan, Kok-Keong: Linear preservers on matrices, 67

Chang, Sin-Chung: On the product of convex combinations and the Kantorovich inequality, 9

Chillag, David: Generalized circulants and class functions of finite groups, 191

Chu, King-wah Eric: The solution of the matrix equations $AXB - CXD = E$ and $(YA - DZ, YC - BZ) = (E, F)$, 93

Don, F. J. Henk: On the symmetric solutions of a linear matrix equation, 1

Fischer, P.: Substochastic matrices and von Neumann majorization, 247

Geldenhuys, G. and Sippel, C.: Bounds for the real eigenvalues of a cascade matrix, 127

Higman, D. G.: Coherent algebras, 209

Kräuter, Arnold R: On the greatest distance between two permanental roots of a matrix, 39

Kwong, Man Kam: *See* Bapat, R. B.

Lim, Ming-Huat: *See* Chan, Gin-Hor

Milaszewicz, J. P.: Improving Jacobi and Gauss-Seidel iterations, 161

Müller, Vladimír: On the spectrum of an infinite graph, 187

Ng, C. T.: The equation $F(x) + M(x)G(l/x) = 0$ and homogeneous biadditive forms, 255

Russell, A. M. and Upton, C. J. F.: A class of positive semidefinite matrices, 121

Saitoh, Saburou: Quadratic inequalities deduced from the theory of reproducing kernels, 171

Sippel, C.: *See* Geldenhuys, G.

Tan, Kok-Keong: *See* Chan, Gin-Hor

Trench, William F.: A note on solving nearly triangular Toeplitz systems, 57

Upton, C. J. F.: *See* Russell, A. M.

Vandewalle, Joos: *See* Van Huffel, Sabine

Van Huffel, Sabine and Vandewalle, Joos: Algebraic relationships between classical regression and total least-squares estimation, 149

Waterhouse, William C.: Elementary divisors of s-symmetric matrices, 241

Weichsel, Paul M.: Polynomials on graphs, 179

Contents Volume 93, August 1987

F. J. Henk Don (The Hague, The Netherlands)
On the Symmetric Solutions of a Linear Matrix Equation 1

Sin-Chung Chang (Cleveland, OH)
On the Product of Convex Combinations and the Kantorovich Inequality 9

Arnold R. Kräuter (Santa Barbara, CA)
On the Greatest Distance Between Two Permanental Roots of a Matrix 39

William F. Trench (San Antonio, TX)
A Note on Solving Nearly Triangular Toeplitz Systems 57

Gin-Hor Chan (Singapore), Ming-Huat Lim (Kuala Lumpur, Malaysia), and Kok-Keong Tan (Halifax, Nova Scotia, Canada)
Linear Preservers on Matrices 67

W. Byers (Montreal, Quebec, Canada)
Matrices Induced by Endomorphisms of Finite Sets 81

King-Wah Eric Chu (Reading, England)
The Solution of the Matrix Equations $AXB - CXD = E$ and $(YA - DZ, YC - BZ) = (E, F)$ 93

R. B. Bapat and Man Kam Kwong (DeKalb, IL)
A Generalization of $A \circ A^{-1} \geqslant I$ 107

Zhi-Hao Cao (Stony Brook, NY)
Residual Error Bounds of Generalized Eigenvalue Systems 113

A. M. Russell and C. J. F. Upton (Parkville, Victoria, Australia)
A Class of Positive Semidefinite Matrices 121

G. Geldenhuys (Stellenbosch, South Africa) and C. Sippel (Western Levels, South Africa)
Bounds for the Real Eigenvalues of a Cascade Matrix 127

Kirby A. Baker (Los Angeles, CA)
Strong Shift Equivalence and Shear Adjacency of Nonnegative Square Integer Matrices 131

Sabine Van Huffel and Joos Vandewalle (Heverlee, Belgium)
Algebraic Relationships Between Classical Regression and Total Least-Squares Estimation 149

J. P. Milaszewicz (Buenos Aires, Argentina)
Improving Jacobi and Gauss-Seidel Iterations 161

SABUROU SAITOH (Pittsburgh, PA)
Quadratic Inequalities Deduced from the Theory of Reproducing Kernels 171

PAUL M. WEICHSEL (Urbana, IL)
Polynomials on Graphs 179

VLADIMÍR MÜLLER (Praha, Czechoslovakia)
On the Spectrum of an Infinite Graph 187

DAVID CHILLAG (Haifa, Israel)
Generalized Circulants and Class Functions of Finite Groups 191

D. G. HIGMAN (Ann Arbor, MI)
Coherent Algebras 209

WILLIAM C. WATERHOUSE (University Park, PA)
Elementary Divisors of s-Symmetric Matrices 241

P. FISCHER (Guelph, Ontario, Canada)
Substochastic Matrices and von Neumann Majorization 247

C. T. NG (Waterloo, Ontario, Canada)
The Equation $F(x)+M(x)G(l/x)=0$ and Homogeneous Biadditive Forms 255
